## Personal Antimicrobial Wipe by SAFETEC

Convenient 5" x 8" towelette premoistened with PCMX and SD-alcohol to kill 99.9% of germs on contact. The extra-strength towelettes condition the skin with aloe vera while removing organic matter and transient resident microorganisms. Helps comply with OSHA handwashing regulations and to eliminate cross contamination.

### Results of Independent Laboratory Time Kill Test Studies

June 1998

Organism	Related infections or diseases	Number Control Population (CFU/ml)	Number of survivors after 15 second exposure (CFU/ml)	Percentage Microbial Reduction
<i>Escherichia coli</i> ( <i>E. coli</i> )	Urinary tract infections, infantile diarrhea	$5.0 \times 10^6$	<2	>99.9%
<i>Vancomycin Resistant Enterococcus faecalis</i> (VRE)	Nosocomial (hospital-acquired) infections of the urinary tract and infections occurring after abdominal surgery	$4.0 \times 10^6$	<2	>99.9%
<i>Staphylococcus aureus</i>	Skin lesions, boils, wound infections, food poisoning, osteomyelitis	$1.0 \times 10^7$	<2	>99.9%
<i>Methicillin resistant Staphylococcus aureus</i> (MRSA)	Nosocomial infections	$1.0 \times 10^7$	<2	>99.9%
<i>Staphylococcus epidermidis</i>	Bacterial endocarditis, associated with prosthetic heart valve disease	$4.8 \times 10^6$	≤100	>99.9%
<i>Streptococcus pyogenes</i>	Tonsillitis, pharyngitis, impetigo, pneumonia,	$1.1 \times 10^6$	<2	>99.9%
<i>Klebsiella pneumoniae</i>	Bacterial pneumonia, upper respiratory tract infections, sinusitis	$7.2 \times 10^6$	<2	>99.9%
<i>Pseudomonas aeruginosa</i>	Nosocomial infections of skin, respiratory, GI and urogenital tracts; infections associated with burns	$6.6 \times 10^7$	<2	>99.9%
<i>Pseudomonas cepacia</i>	Bacterial pneumonia in patients with Cystic Fibrosis, septicemia	$7.9 \times 10^6$	<2	>99.9%
<i>Streptococcus pneumoniae</i>	Bacterial pneumonia, bacterial meningitis, otitis media (ear infections), sinusitis	$4.8 \times 10^4$	<2	>99.9%
<i>Serratia marcescens</i>	Nosocomial infections including pneumonia and surgical wound infections	$5.0 \times 10^7$	<2	>99.9%
<i>Listeria monocytogenes</i>	Sepsis and bacterial meningitis in neonates, transplacental infection, conjunctivitis	$1.8 \times 10^7$	<2	>99.9%

#### Order No.

34400	Individually Wrapped Towelettes	100 per dispenser box, 10 boxes per case
